## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 20-25,27-30 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or make obvious a d-q voltage calculating unit that calculates a voltage  $e_d$  which is a d-axis component of a counter-electromotive force, and a voltage  $e_q$  which is a q-axis component of the counter- electromotive force; a q-axis command current calculating unit that calculates a current command value  $I_{qref}$ , which is a q-axis component of a current command value, on the basis of the voltage  $e_d$  and the voltage  $e_q$ ; a d-axis command current calculating unit that calculates a current command value  $I_{dref}$  that is a d-axis component of the current command value; a phase current command value calculating unit that calculates phase current command values of the respective phases on the basis of the current command values  $I_{qref}$  and  $I_{dref}$ ; a motor current detecting circuit; and a current control unit, wherein differences between the phase current command values and the detected motor phase currents are inputted to the current control unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see PTO-892).
